Flushing Financial Corporation Reports 3Q23 GAAP EPS of \$0.32 and Core EPS of \$0.31; Delivered Sequential EPS and GAAP NIM Expansion as Action Plan Continues to Progress; Opened 27th Branch Expanding Asian Market Presence

“We delivered sequential EPS and GAAP NIM expansion through the continued execution of our action plan to drive long-term profitability while advancing our near-term areas of focus amid persisting challenges in the operating environment. In 3Q23, we made significant progress on delivering against all pillars of our action plan, including: 1) reduced interest rate risk and moved closer to our goal of interest rate neutrality, including the addition of \$100 million of interest rate hedges; 2) increased yields on new loans 288 bps YoY and 34 bps QoQ, with an emphasis on floating rate loans and back-to-back swaps; 3) increased noninterest bearing deposits \$46.6 million QoQ; 4) saw strength in debt service coverage for our multifamily and investor commercial real estate portfolios repricing through 2025, with our stress testing (200 bps increase in rates and 10% rise in operating expenses) indicating a resilient borrower base; Manhattan office buildings are minimal at 0.6% of net loans; 5) maintained stability in available liquidity and capital ratios; and 6) emphasized noninterest expenses. We’re confident that our ability to execute will guide us through the near-term challenges and enable the Bank to emerge as a strong and more profitable institution.”

- John R. Buran, President and CEO

Uniondale, N.Y., October 31, 2023 (GLOBAL NEWSWIRE) – **QoQ, EPS Increases; GAAP NIM Expands; Minimal Core NIM Compression.** The Company reported third quarter 2023 GAAP EPS of \$0.32, up 10.3% QoQ, but down 57.9% YoY. Core EPS totaled \$0.31, an increase of 19.2% QoQ, but a decrease of 50.0% YoY. The improvement in core EPS QoQ was primarily driven by lower credit costs, higher noninterest income, and lower operating expenses, partially offset by slight NIM compression. GAAP NIM of 2.22% increased 4 bps QoQ but declined 85 bps YoY; while Core NIM of 2.14% compressed 3 bps QoQ and 89 bps YoY. Our actions to reduce interest rate risk, including adding interest rate hedges and floating rate loans, assisted in reducing the NIM compression and are beneficial in a “higher-for-longer” rate environment.

Strong Credit Quality; Stable Capital. Nonperforming assets decreased 23.2% YoY and 3.1% QoQ while net recoveries were \$42,000 in 3Q23. Capital continues to be sound with TCE/TA¹ of 7.59% at September 30, 2023, compared to 7.71% at June 30, 2023.

- (1) Ratios are presented on an annualized basis, where appropriate.
 - (2) Yields are calculated on the tax equivalent basis using the statutory federal income tax rate of 21% for the periods presented.
 - (3) Efficiency ratio, a non-GAAP measure, was calculated by dividing core noninterest expense (excluding OREO expense and the net gain/loss from the sale of OREO) by the total of core net interest income and core noninterest income.
 - (4) Calculated by dividing stockholders' equity by shares outstanding.
 - (5) Calculated by dividing tangible stockholders' common equity, a non-GAAP measure, by shares outstanding. Tangible stockholders' common equity is stockholders' equity less intangible assets. See "Calculation of Tangible Stockholders' Common Equity to Tangible Assets".
 - (6) See "Calculation of Tangible Stockholders' Common Equity to Tangible Assets".
 - (7) Excludes performing nonaccrual TDR loans in periods prior to 1Q23.

RECONCILIATION OF GAAP EARNINGS and CORE EARNINGS

Non-cash Fair Value Adjustments to GAAP Earnings

The variance in GAAP and core earnings is partly driven by the impact of non-cash net gains and losses from fair value adjustments. These fair value adjustments relate primarily to borrowings carried at fair value under the fair value option.

Core Net Income, Core Diluted EPS, Core ROAE, Core ROAA, Pre-provision Pre-tax Net Revenue, Core Net Interest Income FTE, Core Net Interest Margin FTE, Core Interest Income and Yield on Total Loans, Core Noninterest Income, Core Noninterest Expense and Tangible Book Value per common share are each non-GAAP measures used in this release. A reconciliation to the most directly comparable GAAP financial measures appears below in tabular form. The Company believes that these measures are useful for both investors and management to understand the effects of certain interest and noninterest items and provide an alternative view of the Company's performance over time and in comparison, to the Company's competitors. These measures should not be viewed as a substitute for net income. The Company believes that tangible book value per common share is useful for both investors and management as this measure is commonly used by financial institutions, regulators, and investors to measure the capital adequacy of financial institutions. The Company believes these measures facilitate comparison of the quality and composition of the Company's capital over time and in comparison, to its competitors. These measures should not be viewed as a substitute for total shareholders' equity.

These non-GAAP measures have inherent limitations, are not required to be uniformly applied and are not audited. They should not be considered in isolation or as a substitute for analysis of results reported under GAAP. These non-GAAP measures may not be comparable to similarly titled measures reported by other companies.
